

## Draughtsperson/ Design Engineer - Job Specification

### The Role

Responsible for developing innovative design solutions for high-quality products and processes; ensuring they are practical and suitable for manufacture.

- Primarily based at our premises in Dalston, with occasional travel to Customer plants throughout the UK and Europe
- Hybrid/ remote working negotiable
- Full time, permanent, 40 hours per week with overtime regularly available
- Salary dependent on skills and experience

### Essential attributes

- Proficient in 3D modelling and AutoCAD
- Sound knowledge of engineering principles
- Strong written and verbal communication skills
- Strong attention to detail
- The ability to work independently and as part of our team
- A positive and flexible approach to working

### Desirable attributes

- Experience with Solidworks
- Experience working in the food and beverage industry

### Main responsibilities

- Work with the design team, manufacturing departments, suppliers, sub-contractors, and customers to solve complex problems and deliver solutions that meet customer timescales.
- Visit customer sites in the UK and abroad to carry out site surveys and gather information so that proposals, drawings, specifications, and related documents can be generated.
- Process and manage Sales Orders/Work Orders ensuring customers receive products and services that meet our quality standards, to agreed timescales.
- Manage time and workload effectively to ensure Design deadlines are met.
- Lead discussions and agree new processes, designs, and layouts with customers.
- Produce high quality detailed design drawings for manufacture.
- Ensure all designs meet the relevant H&S regulations and British Standards.
